Summary

Data Science student and founder with about 2 years of experience (including freelancing) building end-to-end AI, ML and automation applications. Works across LLMs, NLP, Generative AI, data analytics and workflow automation, with 110+ projects reported across functional applications, prototypes and academic work. Looking for Prompt Engineer, Data Scientist, ML Engineer and Software Developer roles.

Skills

Languages: Python, R, SQL, JavaScript, TypeScript

AI / ML / Data: Machine Learning, Generative AI, LLM Integration, NLP, Prompt Engineering, Pandas, EDA, Predictive Analytics, Forecasting, Spark, Power BI, Tableau

Databases: PostgreSQL, MongoDB, Firebase, SQLite, Redis

Tools & Cloud: Git, GitHub, Docker, AWS (fundamentals), Google Cloud Platform, Jupyter, Excel, n8n, Gemini API, Claude AI, Lovable

Experience

YourNeed AI yourneed-krish-gupta.ai.studio

Founder

- Founded an AI-focused technology initiative helping students, startups and businesses with AI, data science, web development, automation and branding.
- Built related demos including an AI-assisted brand identity tool (Brand Blueprint), a business-growth site (Grow Global) and an e-commerce site.

Justice for All / Nyaya Mitra justice-for-all.ai.studio

Founder

- Founded an AI legal-assistance platform with conversational, multilingual and voice-enabled access, using LLM integration, NLP and document analysis.

Teloz Space 12 months

- Built Python and Excel automation workflows to replace repetitive manual tasks and save time on routine operations.
- Created data visualizations and dashboards to turn raw data into clear, decision-ready insights.
- Cleaned, validated and organized large datasets to improve accuracy and reporting quality.
- Prepared automated reports and collaborated with the team to meet business requirements.

Freelance & Independent Projects 2 years (total experience)

Software Developer

- Delivered 110+ reported projects across AI applications, data analytics, business websites, e-commerce and academic work.
- Built automation systems: trading signal and decision engine, automated video editing, AI calling agent, YouTube publishing, PowerPoint generation and LinkedIn job-application automation.

My Projects

- **DataGod.AI:** Automated data analysis tool that generates dashboards, insights and reports. *Technologies:* Python, Pandas, Data Visualization.
- **AI Titan:** Trading signal system that produces buy/sell decisions from 11 analytical indicators (signals only, no live execution). *Technologies:* Python, Analytics, Automation.
- **NutriMind AI:** Food recognition and calorie-tracking concept with nutrition coaching. *Technologies:* Computer Vision, AI.
- **BCI-AI Brain-to-Text**: EEG and deep-learning concept for brain-to-text communication. *Technologies:* Deep Learning, Signal Processing.
- **AI Climate Architect:** Sustainable-city concept using generative AI, GIS and satellite data. *Technologies:* Generative AI, GIS.
- **Emotion-Aware AI Companion:** Multimodal emotion-recognition conversational companion concept. *Technologies:* Multimodal AI, NLP.
- **Health Risk Prediction and Appointment No-Show Analytics (Academic):** Obesity and chronic-disease risk prediction, plus no-show analysis of EMR data. *Technologies:* Python, Pandas, ML.

Education

University of Mumbai (DTSS College) 2024 – 2027

B.Sc. in Data Science ***CGPA: 9.6/10***

FY B.Sc. Data Science Topper **Languages:** Hindi, Marathi, English (B2)

Certifications

- **Prompt Engineering for Generative AI**; **Generative AI and Artificial Intelligence**; **Data Analysis and Visualization**; **Business Analysis** – LinkedIn Learning / Microsoft.
- **GenAI-Powered Data Analytics Job Simulation**; **Data Visualisation: Empowering Business with Effective Insights** – Tata / Forage.
- **Technology Job Simulation**; **Data Analytics Job Simulation** – Deloitte / Forage.
- **Python and Machine Learning**; **AWS for Beginners** – Great Learning.
- **AI Engineer**; **Data Analyst** – One Roadmap.
